HireOne/Refer One...Making connections to find your next employer

Are you searching for your next great job opportunity or are you willing to refer someone else to a position that is not the right fit for you? Join us to network with hiring managers who have open opportunities or who could refer you.

HireOne/ReferOne is a highly successful business networking event where employers network with professional level job seekers from a variety of industries, to provide referrals that lead to interviews and hiring opportunities. Networking and making connections are important parts of finding any position since *80% of the people who get hired are through referrals.*

Visit the [Registration page](#) for lists of attending employers and open positions.

Jump Start Your Job Search Workshop

9 a.m. - 4 p.m., Saturday, April 28

Church of the Saviour * 651 North Wayne Avenue * Wayne, PA

Cost \$15

-an interactive day of information and ideas to provide help and hope in your job transition-

[click here to register.](#)

NOTE: Ordinarily , Joseph's People does not advertise events that cost money, but JUMP START is held ONLY twice a year and it is run by Amy Dinning, whom many of you have heard speak at our Joseph's People meetings. Amy is a fantastic speaker, a generous supporter of unemployed people and Joseph's People and puts a lot of heart and energy into this event. If you can go, then do so.

6TH ANNUAL RETREAT

The Retreat was a great day. 75 of our members and some additional volunteers enjoyed a respite from the cares of daily life. The sun was shining, it was warm. The speakers were terrific and the dinner was tasty, of course.

Thanks must go to Malvern Retreat House that gifts this event to us. Were it not for them, we could never hold it. Also to all of the volunteers who organized and worked hard to make it the day it was. Watch the web page for photos that will be going up shortly.

ALBRIGHT COLLEGE

NOW HIRING

Groundskeeper

Founded in 1856, Albright College is a nationally ranked, private college with a rigorous liberal arts curriculum with an interdisciplinary focus. Albright enrolls about 1,700 undergraduates in traditional programs, another 800 adult students in accelerated degree programs, and 100 students in the master's program in education. Albright College is located on 118 acres in Reading, Pennsylvania.

Perform a variety of tasks in support of ground maintenance and college activities. Tasks include; mowing, plant health care, snow removal, special events set-up, athletic field maintenance, and trash removal. The experience and ability to operate equipment used for grounds (i.e. mowers, trimmers, hand and power tools, etc.) maintenance is required. Will lift up to 100 lbs. Applicants must be willing to work under direct supervision and hold a valid driver's license. Must have a high school diploma or equivalent and one year of directly related grounds

maintenance experience. Albright is an AA, EEO employer and is actively committed to diversity within its community. In pursuit of that, we actively encourage diversity among applicants for this position. Protected veterans and people with disabilities are encouraged to apply. **Free College tuition after one year of service.**

Job Code : JNJJNP00048969

Job Title: Logistics Analyst

Location: Malvern,PA,19355 or Titusville NJ

Duration: 10 Months

Job Description:

The PDMS Clinical Supply Chain holds the global responsibility for all clinical supplies of the Research & Development portfolio and the Global Medical Affairs portfolio.

Our activities include all in-house and outsourced manufacturing of clinical supplies (API, Drug Product, Packaged and Labeled Clinical Supplies), demand forecasting, supply planning, and global distribution of clinical supplies.

We are actively seeking a Logistics Analyst, responsible for **supporting global distribution activities for clinical supplies, to be based out of Malvern, PA or Titusville, NJ.**

Description of Role:

This role is responsible for **operational support of worldwide distribution activities of clinical supplies** within Pharma R&D (large and small molecules; for all phases of clinical trials, primarily North and South America geographic regions with support to EU and ROW as required) as part of the Trial Supply Management organization.

Role Responsibilities:

- Monitor the **performance of existing logistics and distribution providers** and support efforts to ensure continuous improvement by the providers. Compile data and analyze trending through utilization of KPI and quality metrics.
- Continuously analyze providers and vendors in collaboration with business partners (e.g. Procurement/Sourcing, Regional/Worldwide Transportation Organizations, QA) to identify new solutions and services, ensuring the most efficient and cost effective distribution providers are available to end users.
- Support and manage executional preparedness for the expanding reach of clinical trial operations. Analyze providers for capabilities and solutions to support these needs.
- Provide subject matter expertise to Trial Design and Trial Supply Management support to ensure the optimal logistics network is utilized during trial conduct.

- Identify and support the development and implementation of solutions between IVR and Logistics provider network to ensure that order integrity is maintained and manual intervention is minimized in the order fulfillment process.
- Utilize resources to continuously analyze and recommend the optimal materials for cold-chain and other critical condition shipping materials. Manage the system to oversee global inventory management of these supplies.
- Leverage the RTO (Regional Transportation Organization) to apply existing compliance and security resources to the Trial Supply Management logistics network.
- Support Import/export issue resolution (primarily in the Americas with ROW support as required)
- Forecast for depots and couriers in order to make sure that they can commit to the distribution demand in order to deliver supplies on time and with the right quality.

Qualifications:

- Knowledge and understanding of clinical study needs and clinical operations is preferred.
- Experience in managing distribution, transportation, and logistics.
- Knowledge of ambient, cold and / or frozen distribution requirements
- Knowledge of import/export processes
- Knowledge of IVRS functionality or EDI-based shipment order processing is a plus
- Ability to collaborate internally and externally to develop partnerships with key stakeholders and service providers to identify, shape, and deliver logistics and distribution solutions.
- Ability to work independently in a cross functional and cross cultural environment
- Strong operational and analytical skills
- Working knowledge of SAP and Logistics Track and Trace systems
- Understanding of 3rd party supplier purchasing (RFP), contractual, and budgeting processes

If interested: Please provide us the following information:

- 1) Hourly rate on W2 or expected salary: _____
- 2) Resume in Word format: _____
- 3) Contact information, where we can reach you: _____
- 4) Your Status (Citizen/EAD/Green Card): _____

I look forward to hear from you.

Sales and Project Manager

Job Description

Do you have a background in either the consulting services or catalyst/chemical industries in which you have developed both sales and project management skills? If so, consider joining our team at The Catalyst Group (TCG)! With over 35 years of experience, we are a worldwide technical and commercial consultancy, specializing in business process-driven change.

TCG consists of two organizations: The Catalyst Group Consulting (TCGC), which brings our unique competency and talent base directly into our clients' companies by working on both a traditional project-specific business model, for one-time project work, as well as a key account model creating an internal resource extension to your business and allowing for an intimate relationship within our client's team. The Catalyst Group Resources (TCGR) is an information company for ongoing monitoring of technical and commercial developments in the process industries, delivering its value-added services via membership programs, multi-client studies, industry publications and conferences/workshops.

We are currently seeking a dynamic and highly-qualified Sales and Project Manager to develop client accounts and deliver project/product sales, as well as manage projects/studies on behalf of both our TCGC and TCGR divisions for the catalyst/chemical, petrochemical, fuels and polymer industries. This is a full-time salaried position that will require you to travel approximately 20% to 25% of the time, and that allows you to make a significant and tangible difference to our company while maintaining an independent working style. If this sounds like the kind of career move you've been looking for, and if you meet our qualifications, we want to talk with you!

Here's just some of what we have to offer:

- Competitive salary
- Performance bonus structure based on both individual performance and the company's overall performance and profitability
- Full medical/dental/vision benefits
- Retirement benefit (Simple IRA)
- Generous vacation allowance
- 10 paid holidays per year
- Beautiful suburban office
- Small team environment
- Flexible and entrepreneurial setting

Job Responsibilities

As Sales and Project Manager, your duties will be divided between Project/Product Sales (approximately 50%) and Project/Product Management (approximately 50%). Your specific duties in this role will include:

Project/Product Sales (50%) □ Actively develop TCGC consulting project engagements and market/sell TCGR program memberships, multi-client studies and industry subscriptions, meeting set quarterly revenue goals □ Conduct TCGC client engagement and project initiation, including proposal development and post-engagement retainer work □ Market and sell TCGR's established member-driven subscription programs, topical multisubscriber studies and publications, including new study topic development and post-report follow-up □ Extend relationship development with strategic accounts – companies vital to TCGC and TCGR success with on-going projects and memberships/subscriptions □ Identify and develop new client relationships by introducing and justifying proprietary consulting and/or membership/subscription services □ Work with client/subscriber personnel and utilize internal TCGC/TCGR technical and market information in order to develop and deliver sales/promotional presentations

Project/Product Management (50%) □ Plan and manage the execution of client-driven projects (for TCGC) and membership- and subscription-based deliverables (for TCGR) □ Establish, coordinate and manage project teams and their deliverables based on resources which are both internal and external to TCGC/TCGR □ Gather commercial and technical intelligence and apply TCGC/TCGR tools and methodologies □ Manage the analysis and report generation required to satisfy single-client projects and/or membership- and subscriber-based reports □ Direct internal market research team and external (Dialog Group®) consultants to execute informational needs □ Synthesize analytics and assimilate the work of others into an impactful and insightful deliverable, including recommendations for approval □ Represent the project, study or membership team at meetings, including presentation to internal TCGC/TCGR management and on-site to clients and/or members/subscribers □ Proactively balance the scope, schedule, budget, quality and risks of each project/deliverable □ Coach, mentor, motivate and supervise team members and contractors, including identifying and resolving any issues within the team □

Establish and grow areas of technical/commercial expertise in one or several areas of the catalytic process and/or catalysis industries, including refining, petrochemicals, environmental and polymerization

Job Requirements As Sales and Project Manager, you must be a self-motivated and dynamic individual with an entrepreneurial outlook and the ability to learn quickly. You must also be highly organized and detail oriented with strong analytic and problem-solving abilities. It is also important that you display excellent verbal and written communication, interpersonal and presentation skills and the ability to build and maintain strong client relationships while also motivating and managing small teams of professionals. Requirements Specific qualifications for the role include: 7-15 years of industry experience with a proven sales/business development track record Prior experience in consulting services or catalyst/chemical, petrochemical, fuels and polymer industries Strong client relationship development/management skills Excellent project management skills Demonstrated ability to simultaneously manage multiple projects while working with technical staff Willingness to be flexible and commit the additional time and effort necessary to meet project deadlines during periods of heavy workload Chemistry/chemical engineering background, preferred
